Dear Mr. Delikat,

The Washington Patriot Construction, LLC (WA Patriot) team that collaborated on the Install Elevator and Remodel B433; Neil, Ken, Cathy, and Mike, would like to personally recognize your team's contribution to the success of this project. The project with the multiple unknown conditions and design challenges presented a unique opportunity. The continued support we received from you and your team contributed to make this project a success.

WA Patriot recognizes that the success of any project relies on strong partnerships with dedicated companies like Sound Glass. Your efforts to work through the project goals and schedules exemplified WA Patriot's Teamwork Attitude and Approach.

We would like to specifically thank you and Tim Johnson for your efforts on the project. The B433 phasing schedule was significantly challenging, and you and Tim Johnson both worked with the WA Patriot team to develop solutions, work through options, and get the job done, despite multiple changes in the schedule. Through your efforts, in working with Ken, we were able to get this done on budget, ahead of schedule, and most importantly safely. Flexibility and adaptability are the keys to success on any project and your team displayed both in abundance.

Please accept our gratitude and recognition for your team's commitment and dedication to the success of the project. Sound Glass continued partnership and outstanding performance resulted in another successful outstanding project. We truly look forward to continuing our partnership with you and Sound Glass on future projects.

Sincerely,

Neil Shaw
Project Manager

Ken Tepley
Superintendent

Cathy Hall
